

## SERVICE

# Network Cabling Specialist

A network cabling specialist installs, tests, labels and maintains low voltage communication distribution systems and signal sources to the terminal or equipment at the end of distribution systems, which comprise the architecture that supports voice, video and data transmissions within industrial, commercial, institutional and office complexes.

Do you have excellent attention to detail? Can you work in a timely manner? Are you interested in traveling for work? Do you like to use hand and power tools? Do you have excellent troubleshooting skills?
